

Measured context reduction by fixture family

14 fixture repositories. Dots are individual replicates; thick bars show each family range; vertical ticks show pooled family reductions. Tokenizer=o200k_base.

62.8% overall fewer transcript tokens

Frontend / 3D

3 replicates

74.8% pooled
range 70.6-78.5%

Backend / data

3 replicates

60.2% pooled
range 56.1-64.6%

Ops / HPC

3 replicates

58.3% pooled
range 53.6-62.9%

Docs-heavy

2 replicates

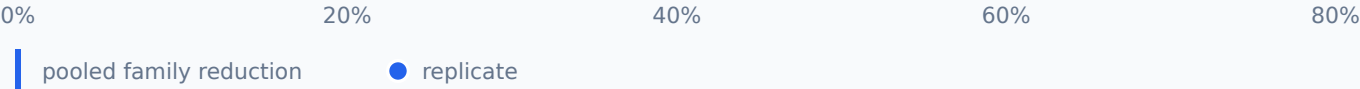

26.5% pooled
range 23.6-29.3%

Original smoke fixtures

3 replicates

58.9% pooled
range 48.5-67.3%

Measured on generated context-gathering transcripts, not private Codex billing telemetry.
